

The actual distance between the rivers on the north line of Winslow is found to be 840 rods. So that the rivers are set laid down on this far enough apart by 88 rods.
Charles Hayden.

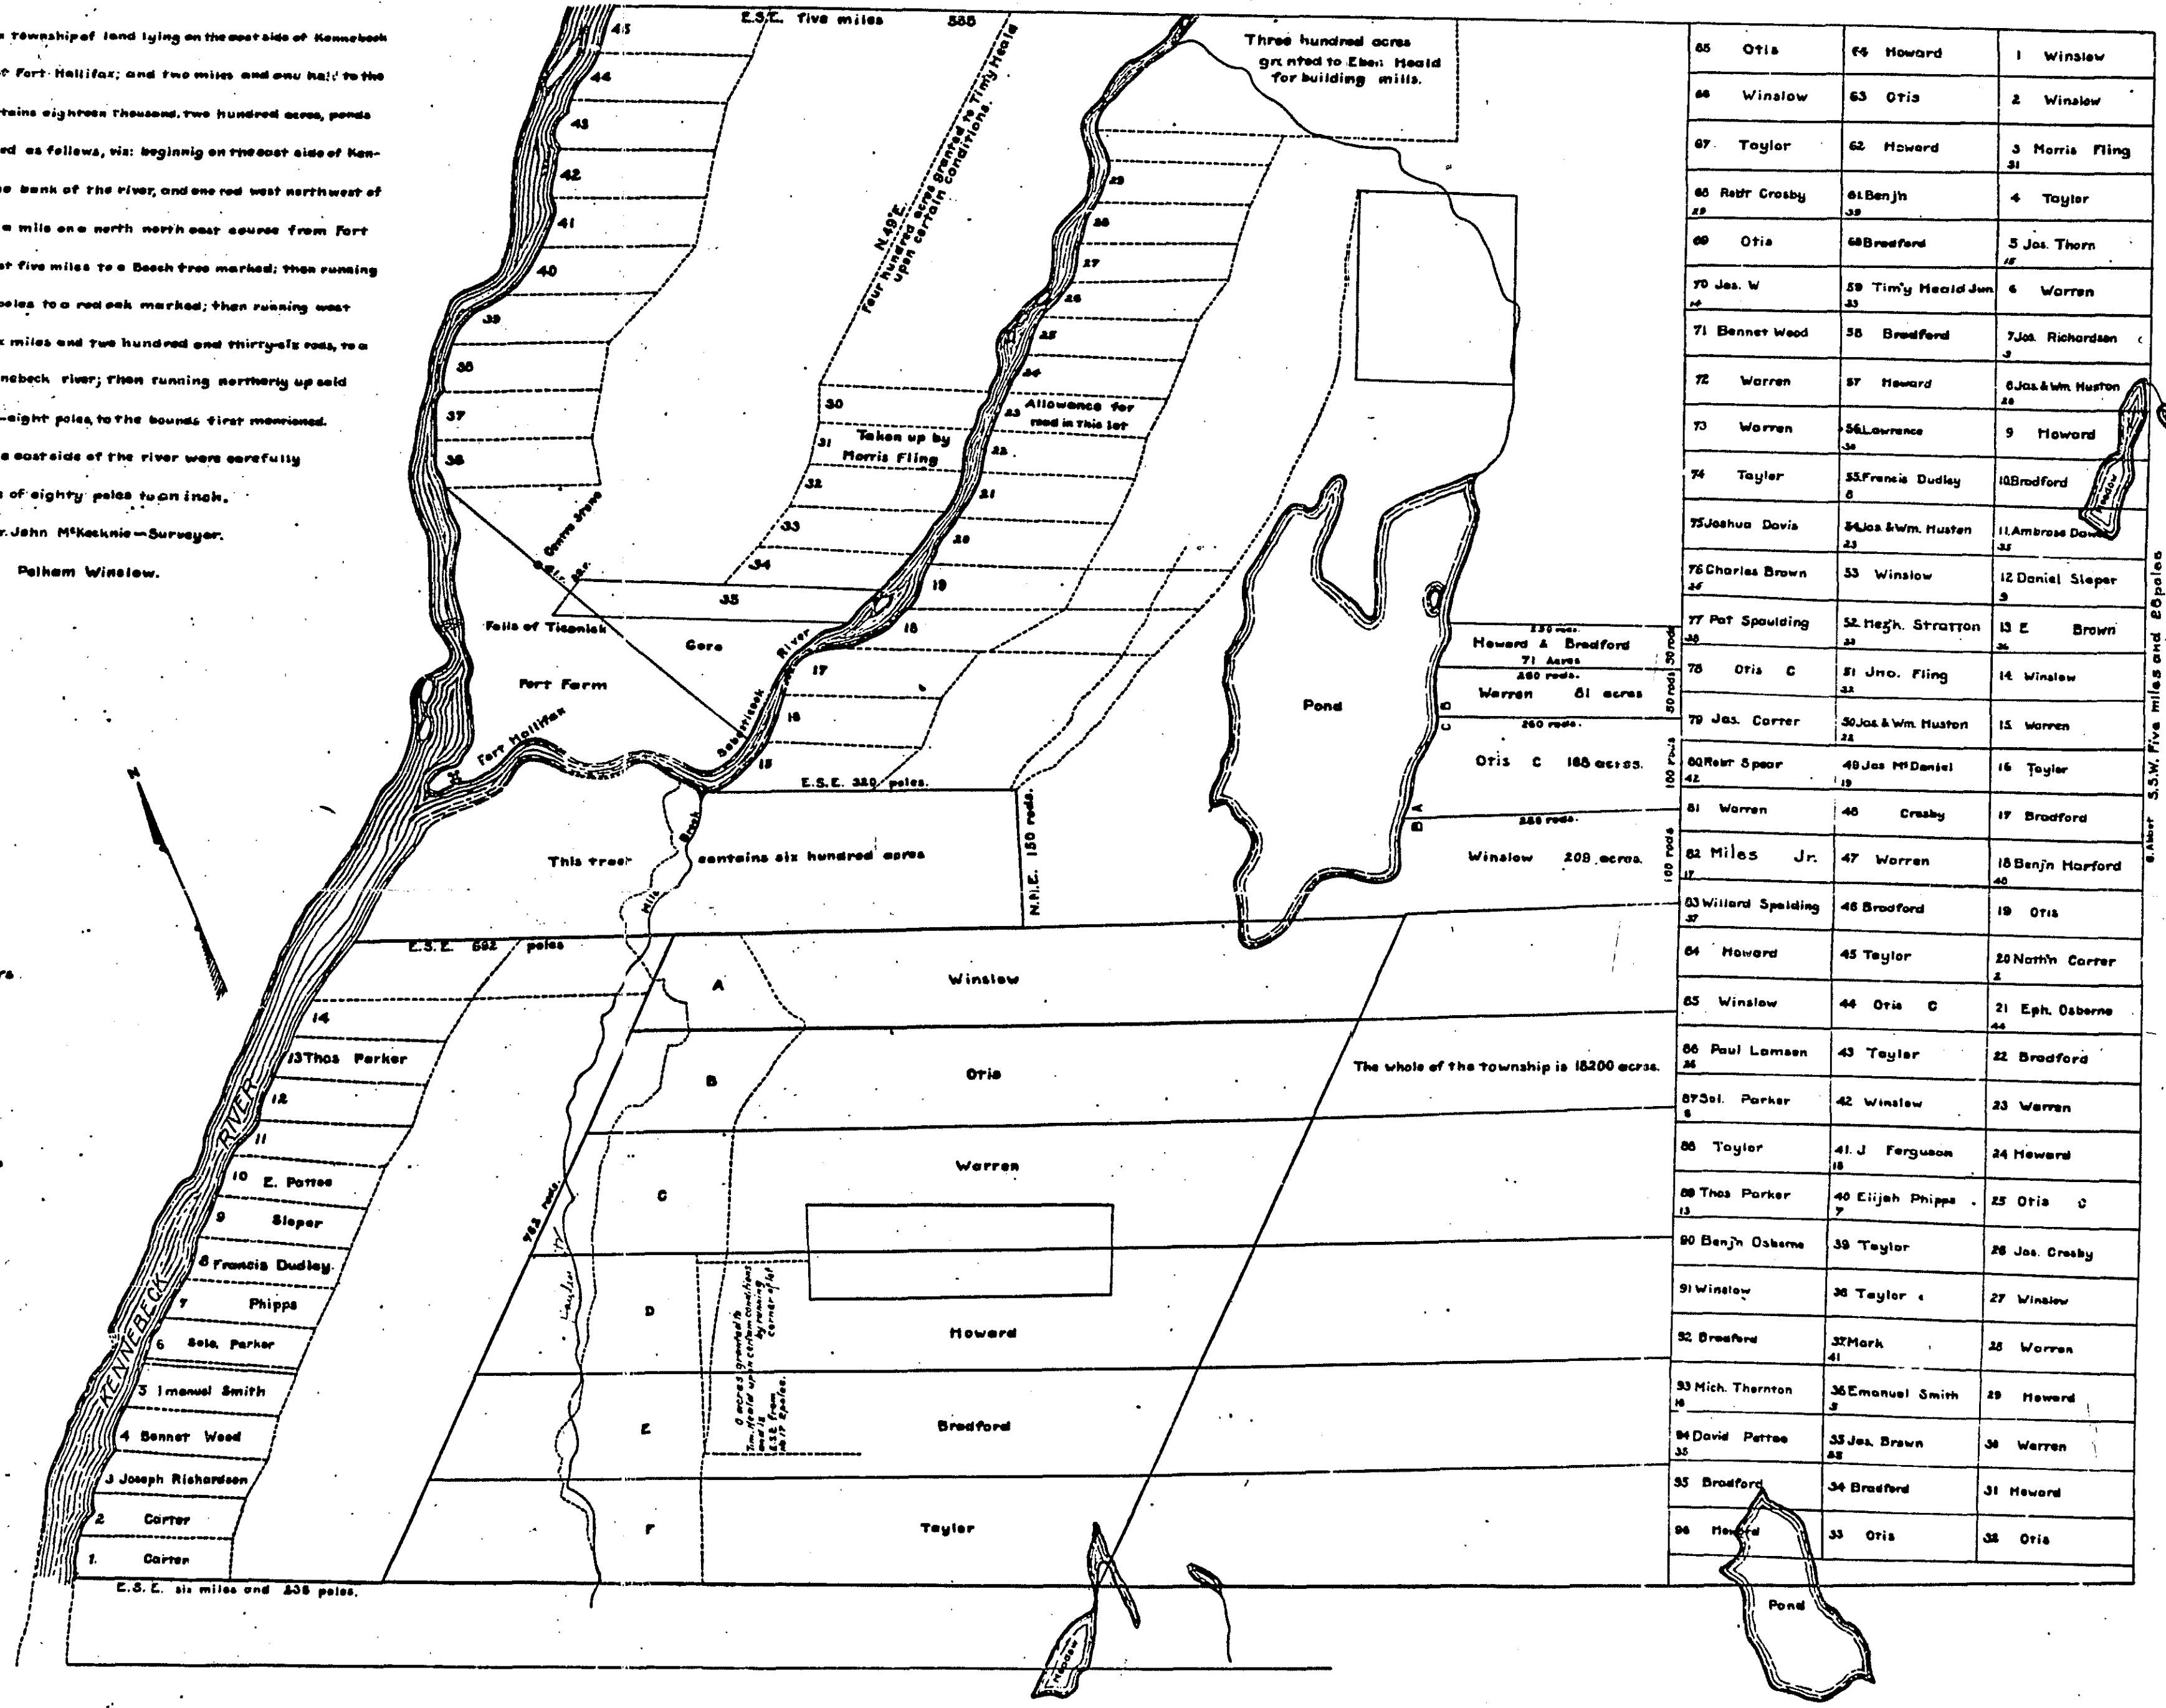

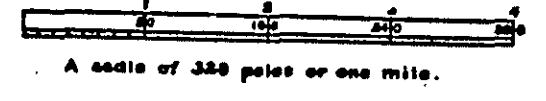

The annexed plan represents an actual survey of a township of land lying on the east side of Kennebec river, two miles and one half to the northward of Fort Halifax; and two miles and one half to the southward of said fort: the whole township contains eighteen thousand, two hundred acres, ponds and Sebasticook river included, and is bounded as follows, viz: beginning on the east side of Kennebec river at Hamlock tree, extending on the bank of the river, and one rod west northwest of a large rock, and two miles and one half of a mile one north north east course from Fort Halifax: from said tree to run east southeast five miles to a Beech tree marked; then running south south west five miles and twenty-eight poles to a red oak marked; then running east north west to Kennebec river, being about six miles and two hundred and thirty-six rods, to a red oak tree standing on the bank of the Kennebec river; then running northerly up said river, on the shore 1/2 m, five miles and twenty-eight poles, to the bounds first mentioned. The external lines and the geography of the east side of the river were carefully taken and run, and is laid down by a scale of eighty poles to an inch.

Dr. John McKee - Surveyor.
